### **TEVTECH TITANIUM SINTERING SYSTEM**

Wilmington, MA. TevTech, LLC has been contracted by ADMA Products, Incorporated Hudson, OH to design and build a Titanium sintering system. The system will be delivered in December, 2005.

The system includes molybdenum and stainless steel hot zone capable of obtaining 1,350°C, a mechanical and diffusion pump combination and PLC control. "Dr. Vladimir S. Moxson, President of ADMA Products, Inc. announced that his company will use this system for sintering powder metallurgy flat products (125" long by 52" wide plates, sheets and foils) and large "chunky" components being produced from Titanium and advanced Titanium alloy powders".

TevTech provides turnkey high temperature vacuum furnace systems, support equipment and engineering solutions for the materials processing industry. For more information on how TevTech's products or services can provide solutions to your advanced materials manufacturing challenges, please contact John DeCosta at (978) 694-9100.
